## "THE WHEAT POOL!"

### Splendid Address Given to Holborn Local Members Saturday Evening.

Following is the address, in part, of the delegate to the recent Convention in Calgary—

"Mr. Chairman and Fellow Members: 'I take great pleasure in presenting to you, this evening, some of the more important matters in connection with our Wheat Pool, gleaned while attending the Convention:

"Steady advancement was made by the Pool during the year 1929. Increase in membership reached a total of 4390, the Pool now having 41,410 members on its lists. In view of the fact that all the first series contracts expired in August 1929, this membership record is very satisfactory; it shows a tremendous confidence in the Pool on the part of a large proportion of the Alberta grain producers.

"The Pool is now operating 437 elevators. The past year 86 new elevators were built and 36 purchased, making an increase of 122. The total Pool country elevator storage is now 16,620,300 bu.; Pool terminal space on the Pacific Coast 8,050,000 bu.

"Total Alberta Pool handlings from 1928 crop amounted to over 67 million bu., 72 p.c. being shipped to Pacific coast 70 p.c. of the total was handled thru A.W.P. elevators.

"The outstanding feature was the steady confidence evinced in the A.W.P. by the great majority of members as well as by a greater percentage of the general public.

"The Pool encountered difficulties, due to unusually heavy production of wheat in practically every country in the world. In spite of this, the marketing policy of the Pool maintained a constant steady effect on the world price of wheat.

"The Pool was involved in a notable legal action

## Here Is Your Chance

- 1 Used Piano; would make good practice piano or for hall use.
- 1 Eight-inch-plate Grain Grinder.
- 1 Ten-inch-plate Grain Grinder.
- 1 Five-tube Marconi Radio, property of the late F. W. Lundy; cheap for cash.
- 3 New 14-inch Cast Tank Heaters, \$10, while they last.

Headquarters for Skaters' Supplies and Curlers' Brooms.

## Stony Plain Hardware.

## USED CARS

Reconditioned Used Cars,  
Ranging in Price from  
\$150.00 to \$900.00.

CASH, OR TERMS.

**E. H. PIDGEON,**

See the Buick Sedan—it is a lovely car.

Buick-Pontiac Motors. Stony Plain.

### Stony Plain and District.

Mr. Chris. Pitzler is, this week, attending the National Dairy Convention which is being held in Calgary, where he is the representative of the Alberta Dairy Pool.

Mr. and Mrs. Gowan, from Birdview, Wash., who were on a visit here with Mr. and Mrs. A. J. Shaul, have returned to their home.

Mr. Hy Treik, who recently returned from an American university, and has since undergone a major operation, is not making as satisfactory progress toward recovery as his friends would wish.

Julia, the young daughter of Mr. and Mrs. L. Fuhr, is recovering from a major operation, performed in Edmonton.

Mrs. W. A. Hemstock, the wife of a leading merchant of Fairview, in the Peace River district, is a visitor with Mrs. Rev. Sauder, at the Manse, during the week end, en route to Rochester, Minn., where she has gone for medical treatment.

Mr. Murd McKinlay lost his Buick sedan by fire late Saturday night, when his garage caught fire.

Early Sunday evening Calgary Power customers noticed that their lights did not shine with their usual brilliance; a majority of the users having to fall back on their auxiliary systems for lights.

Quite a number of the enterprising youths from local farms are attending the I.H.C. Tractor School this week, in Edmonton. Dealer L. Wudel is in attendance every day.

The skating party given on Thursday by the Triple C, proved a great success. After skating, the party repaired to Miller's Hall, where refreshments were served.

All the local admirers of Burns (not the Shamrock brand) are preparing for the big doings at the Macdonald on Burbs' Night, Sat. the 25th.

### Heard on Main Street.

Bill—I see where the Commissioner is asking for more men on the Provincial Police.

Mike—Well, if they're shy a few hands, and want a good man, they can have ours.

during the year and successfully carried its defence to the highest court. The winning of this lawsuit resulted in the definite establishment of the legal status of the pooling system of marketing as developed by the A.W.P.

"Unnecessary to state, we had a good time, and were shown every courtesy by the officials of the Pool, at the head office in the Lougheed building. I thank you."

At the close of the address, when the applause had subsided, it was moved and carried unanimously that the address be printed in pamphlet form.

## Immigration and Unemployment

At the present time much is being said and written on the twin subjects of immigration and unemployment. Hardly an issue of a daily paper appears that does not contain some reference to the problems involved, hundreds of letters to editors are penned expressing one view or another, conferences and conventions pass resolutions, and Governments, Federal, Provincial and Municipal are struggling with the difficulties confronting them. There is in all quarters a tendency manifested to shelve the responsibility on to the other fellow, to, in the descriptive language of the day, "pass the buck," and "let George do it."

Within recent weeks headlines in the press have informed a reading public that "3,000,000 are unemployed in the United States," that in Germany "2,000,000 are out of work," that the number of unemployed in Great Britain "remains between 1,500,000 and 2,000,000," while, coming nearer home, that "the unemployed situation is acute in all large Canadian centres of population."

What is the cause? What is the solution? The United States has been experiencing a period of unexampled industrial growth and activity. In 1929 Canada enjoyed the most prosperous year in its history, with all records for manufacturing, building construction, and development of natural resources reaching new high marks. Despite depression in certain basic industries, Great Britain reports more people at work than before the war, while Germany, we are told, is "coming back," and regaining much of her former strength in the export markets of the world.

In Canada the opinion prevails in many quarters that our unemployment problem is largely due to an influx of immigrants, but such a cause cannot be advanced in the case of Great Britain, Germany, or even in the United States, with its rigidly restricted immigration quotas. Yet unemployment seems to be almost universal; in fact there is less in proportion to population in Canada than in other countries. So, the cause lies deeper than in immigration, although, of course, it undoubtedly has some effect.

In the United States it is not partly accounted for by the fact that for some years past mass production has been maintained on a scale hitherto unknown, and the marketing of this enormous production has only been possible through the sale of every conceivable kind of article on the installment plan, until the average income of the buying public was tied up in advance for long periods. Possibly the saturation point has been reached, and people being unable to buy more, even on a credit basis, production had to slow up.

It is not also true that the enormous sums now invested in automobiles, radios, and other expensive bits, in the case of the average citizen, unproductive devices, being thus withdrawn from productive enterprises is having its effect on other industries.

Again, through the inventive genius of this age, labor-saving machinery and appliances of all kinds have had the result of enabling one man or woman to do the work of two, three or more, with a consequent lessening of the ratio of employment to volume of output. Wages to those employed are higher, but the number of workers actually required in many industries is less, although their output is greater. Here in Western Canada we have an example of this in the big drop in the number of farm helpers required through the introduction of the combined harvester-thresher and the increasing use of motor trucks over horse drawn vehicles. As one result, too, the tendency is again in the direction of larger farms, whereas not many years ago the belief was fairly general that the day of smaller farm holdings providing for more families on the land was approaching.

What governments, economists, manufacturers, labor unions, and our whole citizenship must realize is that a present paradox of unemployment in an era of general expansion and growth is the result of changing world conditions. All countries are affected. Everything is in a state of flux. "And because all countries are affected, and also because far away fields always look green, people everywhere are looking elsewhere to better their condition. The inevitable result is that all countries will more and more restrict immigration as a measure of their own national salvation.

What will happen then? There is only one answer: People will have to adjust themselves to changed, and still rapidly changing conditions. They will have to work out their salvation at home. The problem is a huge and difficult one. Nobody yet has the solution. All must think and study, and that is the sole reason for this article—to encourage real study of the problem, instead of the present prevailing tendency to lay the blame on somebody else.

### Says Insanity Increasing

**Eminent Psychologist Makes Some-  
what Startling Assertion**

After copious consideration and profound contemplation an eminent psychologist asserts that it is only a matter of time when we will all be in the asylum. He finds that insanity is increasing rapidly, that a few centu-

## DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within. The sane and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the interstices of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red box.

W. N. U. 1821

### Good Word For Women Drivers

**New York Commissioner Says More  
Men Break Traffic Laws**

Commissioner of Motor Vehicles, Charles A. Hartnett, states that women drivers in New York State represent 16 per cent. of the total number. In the last four months 27,130 men violated traffic laws—as against 653 women.

On an average day 250 men are arraigned and only four women.

Over this four-month period 3,918 men were up for speeding, as opposed to sixty-six women.

Difficulties over car lights have brought 4,635 men to court, while only sixty-nine women were charged with similar offenses.

Smoking motorists were charged against seventeen men, but against not one woman.

One woman was very legitimately booked for intoxication. To offset that showing there were 132 men accused of driving while drunk.

Thirty women failed to keep to the right, 4,075 men did likewise.

Seven women mistook a one-way street. There were 481 men who made the same error.

Thirty-two women did not have their licenses at a crucial moment. Similar lapses of memory affected 1,226 males.

## INFLUENZA'S VICTIMS

**Left Tweak, Miserable and a Prey  
To Disease In Many Forms**

One of the most treacherous diseases afflicting the people of Canada during the winter months is influenza. It almost invariably ends with a complication of troubles, its victims suffer with alternate fevers and chills, headaches and backaches. It leaves them an easy prey to bronchitis and pneumonia. Indeed, the deadly after-effects of influenza may leave the victim a chronic invalid. You can avoid influenza entirely by keeping the blood rich and red by the use of Dr. Williams' Pink Pills. If you have not done this and the disease attacks you, you can banish it deadly after-effects through the use of this great blood-building nerve-restoring tonic. Here is proof of the power of Dr. Williams' Pink Pills over this terrible illness. Mr. F. H. McMullen, Belleville, Ont., says:—"Some years ago, following a severe attack of influenza, I was left in such a weak condition that my friends thought I would not get better. I began to suffer from indigestion, and my blood got thin and watery. In this weakened condition I began the use of Dr. Williams' Pink Pills, and these did what other medicine had failed to do—brought me back to health and strength. I can honestly say I think them the best blood builder and nerve tonic known, and I shall always praise them."

You can get the pills from your druggist, or by mail at 50 cents a box from "The Dr. Williams' Medicine Co., Brockville, Ont."

### To Pay \$20,000,000 In Cash

The growing prosperity of Canada is indicated in the official announcement that the Canadian Government will redeem in cash a loan of \$20,000,000 payable on February 1, 1930. The revenue of Canada was greater in the first ten days of the current fiscal year than the total for the whole of the year 1928, the first year of Confederation. The surplus of revenues over expenditures last year would have more than paid off the national debt of Canada as it stood in the early seventies of the last century.

**Awful Asthma Attacks.** Is there a member of your family who is in the power of this distressing trouble? No service you can render him will equal the bringing to his attention of Dr. J. E. Kellogg's Asthma Remedy. This remarkable remedy rests its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of success in almost every part of this continent, and even beyond the seas.

### Real Service

If a shower comes up in the city of Berlin, the pedestrians will find on the next corner an automatic machine for the vending of umbrellas. Drop 15 cents in the slot and walk off with a brand-new storm shelter. The umbrellas are made of oiled paper and may not last a lifetime, but they are good for a dozen or more storms, and are right handy when the drops are dropping.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

When it comes to wheat, says the Toronto Globe, Canada is sure of her ground.

**That Sore Throat Needs Minard's.**

# Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

### To Extend News Service

**Movement To Enlarge Newspaper  
Service In Western Canada**

Newspaper publishers and editors of western Canada, members of the Canadian Press, met at Vancouver recently, in preparation for the great extension of the news service in western Canada, following the reorganization of the leased wire telegraph circuits now in progress from Winnipeg to Victoria, which will about double the wordage laid down in the individual newspaper offices and will permit scope for much freer interchange of news as between the four western provinces, as well as the publication of more eastern Canadian news in the west and more western Canadian news in the east.

Proposals of the management for the betterment of the news service, both foreign and domestic, were endorsed and in particular the meeting went on record as recommending to the board of directors of the Canadian Press the early establishment at Tokio of a Canadian Press staff representative, now that a Canadian ministry has been established in Japan.

### B.C. Lumbering Operations

Four hundred plants are engaged in manufacturing lumber products in British Columbia, involving an investment of 200 million dollars. In 1928, the cut was over three billion feet. These plants employ forty thousand people and pay out in wages sixty million dollars annually.

The strong no less than the weak must bear the penalty of their own natures. The man or woman who has learned to stand alone must not complain if left to stand alone much of the time.

### Tribute To Canadian Industry

**Canada Has "Cleanest" Tea Ware-  
house In The World**

On a tour of the Dominion, under the auspices of the British Institute of Certified Grocers, six post graduates visited the Montreal plant of the Salada Tea Company, of Canada, Limited. The following report made by the secretary, Mr. C. L. T. Beech, appeared in the Tea & Coffee Trade Journal, of New York.

"During the tour they (the graduates), inspected some of the whole sale and retail tea concerns in the Dominion, and they considered that the Montreal plant of the Salada Tea Company was the neatest and cleanest tea blending warehouse and packing centre in the world."

Canada has reason to be proud of industries that can make such an impression on visitors of this calibre.

### Falling Hair—Just try Minard's.

There are 21 million telephones in the United States which can be connected to seven million in Europe for conversation, using radio telephony across Atlantic.

At one entertainment given by George Washington, the candles to light the banquet hall cost ten dollars an hour.

**Children Cry

### Unemployment Relief

**Regina City Council Projecting Civic  
Works During Winter Season**

At an actual cost of \$20,000, another sewer programme is now being considered by Regina City officials as an unemployment relief measure, and will supplant the programme already undertaken and nearly completed.

To date this winter, eight and a half blocks of sewers have been dug. day labor in various sections of the city as unemployed relief. As well, a plank walk programme of 18 blocks has recently been started for unemployment relief at a cost of \$5,000.

ten hence practically the whole world will be daffy in the bean. In a universe of nuts a squirrel may be king.

The fact that the world is going crazy is no surprise to some folks. They think that it is that way already. But on the other hand there are some of good repulse who are still able to figure out that this is not such a rotten world after all, and that there is enough skill and intelligence available to keep the machinery running for an indefinite period.—Los Angeles Times.

## Churchill Now Experiencing Its Last Lone Winter Before Advent of New Era Next Spring

Churchill is in the chill midst of its last lone winter. Except for some 20 men—and a single woman—every resident at the Government owned Bay port has moved out to the south. The last scheduled Muskeg Limited pulled down to The Pass in early December and now the mail is "mashed in" twice a month by dog team from Gillam, at Mile 327.

Ice-locked, the 250-year-old harbor is deserted until next spring.

A skeleton force at Churchill is retained by the Hudson Bay Railway which completed the first laying of steel to the harbor 511 miles north-east of The Pass last March, and by the Department of Railways and Canals. But all railway construction and dock labor is at an end for several months. The only remaining of the government radio post, and one of the telegraph offices, the Hudson Bay Company trading post continues its work; and Rev. H. A. Gibson and his wife reside at the Anglican Mission.

Otherwise the settlement at the mouth of the Churchill River, where 1500 men toiled last summer, is abandoned to the chill winds lashing down from the sea.

In all probability, however, the Bay port of the West will never know another so lifeless stretch between autumn and spring. It is certain that the opening of the settlement to the public, planned for next spring, will mark the beginning of a record of at least partially permanent residence at Churchill. Undoubtedly, ingress to the end of the Hudson Bay Railway steel will be closely scanned by the Dominion Government; but a new town will begin to take form when the way is opened to prospective settlers.

The fact that harbor construction work is not expected to reach completion until sometime in 1931 will not prevent a hurried surge of new citizens to Churchill. As yet, under government ruling, three banking establishments alone have marked the arrival of commerce; numerous applications, however, for permission to set up establishments which might flourish on the trade of hundreds of residents busy at the harbor, have been received.

Divine consideration, no doubt, have influenced the government in the decision to supervise closely the settlement's early civic development. Housing accommodation at present is sufficient only for those housed at railway and harbor work; and under existing conditions, water supply and sewage problems yield to but temporary solution. When Churchill assumes the status of a town, it is expected that these difficulties will have been solved.

As a harbor, nevertheless, Churchill has not been slighted by nature. Before it empties into the Bay, Churchill River swells in the shape of an oval bowl with its neck to the sea—a ready-made port. Besides, projecting headland and an island shelter the opening so that storms have little effect on the inner harbor, enclosed as it is by rocky cliffs which rise in some cases to a height of 70 feet.

Along one side of the Churchill River runs the Hudson Bay Railway, reaching almost to the tip of a narrow point projecting out into the bay. It is at the base of this point, formed of rugged rock ridged by

the years, that the townsite, no doubt, will be located; and it is on this side of the river that the government is constructing its harbor works.

According to the report of Frederick Palmer, British engineer retained by the Dominion Government in 1927, to advise regarding the suitability of Nelson and Churchill as harbors, the harbor capacity can be easily increased by a little dredging to accommodate as many and as large vessels as ever will be likely to plan entrance to the port.

In the West, Churchill is looked on as a new port, but in reality its history goes back into the distant past of early Canadians. A Monk, the Danish explorer, is believed to have wintered at Churchill in 1619, more than three centuries ago. Trading vessels of the Hudson's Bay Company sailed into the Bay more than 250 years ago, and utilized Churchill as a haven soon after their early voyages.

Even Fort Prince of Wales, a mass of ruins across the river from the modern tangle of incipient dock construction, is not "old" as the history of Churchill goes. It was almost two centuries ago, during the years from 1733 to 1744, that the Hudsons Bay Company built the huge stoned fort at the mouth of the Churchill River. But 25 years before the completion of Fort Prince of Wales, the company had constructed Fort Churchill. Erection of the original stronghold came after the Treaty of Utrecht, in 1713, established Britain's claim to the Bay country, but fears of the French ruled had persisted long after the incursions of d'Arville, late in the 17th century, temporarily robbed the Hudsons Bay Company of almost all its posts.

Even if Churchill rises to prominence as a Canadian port for Western trade, it cannot lose its place of historic significance in Canadian annals. Even when imports rush in through the Bay to the mouth of the Churchill River, even when prairie wheat surges along the Hudson Bay line and outward to Britain and Europe during the harbor's ice-free period, the gaunt ruins of Fort Prince of Wales, and of the old harbor battery at the tip of the point across the river will remain among the Dominion's history marking sites.

### Horses Were Poisoned

Water From Abandoned Wells Was Responsible For Loss Of Animals

In Southern Saskatchewan, where a poison of which seven drops killed a 1,400-pound horse in three days is produced by bacteria in old wells in Saskatchewan, has been discovered by Dr. J. S. Fulton, professor of animal diseases at the University of Saskatchewan. In one district 30 miles square, from 75 to 100 horses have been lost this winter. On one farm 8 out of 14 horses died. Losses have been commonest in the south and west of the province. Attention was paid to the water supply where outbreaks occurred and it was found that in each case old wells had been used owing to this particularly dry season. Although the wells contained water which appeared fresh, bacteriological examination showed the presence of virulent strains of botulinum in three out of four wells.

The bacteria isolated from these waters when grown in the laboratory, reports Dr. Fulton, produced a poison of which seven drops killed a 1,400-pound horse in three days.

Small quantities of the water itself when fed to experimental animals, caused death in a few days.

### Much Ado About Nothing

"For 10 years, 10 long and lean years," cried the writer, "I have been composing this drama, changing a word here, a line there, working on it until my fingers were cramped and aching, my brain and body weary from the toil."

"Too bad, too bad," the producer murmured sympathetically. "All work and no play."

Color blindness is sometimes called Daltonism, after John Dalton, English scientist who discovered this abnormal condition.

ROBERT L. BURNAP

Announcement has been made at Canadian National headquarters of the appointment of Robert L. Burnap, as Vice-President in Charge of Traffic, with headquarters at Montreal, vice A. T. Weldon, the appointment being effective at once.

R. L. Burnap has been associated with the various lines which now comprise the Canadian National Railway System during the whole of his railroad career of 30 years.

### Champion Back At Work

The Prize Hen Of Saskatchewan University Keeps Up Record

Lady Victorine, the world's champion hen, is back at work. After completing her year's record of 388 eggs, she laid 16 more eggs before commencing to moult on September 27 last. Saskatoon thermometers are recording such temperatures as 42 below zero, but this Barred Rock lady, who lives in an unheated house at the University of Saskatchewan, started in last week and is again laying her daily egg.

Professor Baker commented on the size of the eggs this hen is producing. After one small preliminary egg as a try-out, the seven eggs produced during the past eight days have averaged five grams each over the standard egg weight.

A request was received from the committee of the Madison Square Garden Poultry Show, at New York, for the loan of the hen as a special exhibit. It was decided however, that it was undesirable to send the hen to the show as the university wish to obtain as many chicks as possible from such desirable breeding stock.

### Hydro Development In West

With four large undertakings at present under construction which will ultimately provide 445,000 h.p. hydro-electric development in the Prairie Provinces, there are indications of expansion in industrial activity for 1930 and 1931.

Buyer—Give me a radio tube and a pick-axe.

Seller—Why, we don't carry those things.

Buyer—Some drug store, I'll say.

## Soil Of Canada Has Played A Large Part In Giving U. S. Some Of Its Greatest Citizens

### Closely Related To Marquis

In Two Years' Reward, Wheat Captured World's Championship

Reward wheat, a hard red spring variety with which Joseph H. B. Smith, of Wolf Creek, Alberta, won the world's wheat championship at the 1929 International Grain and Hay Show, Chicago, is closely related to the famous Marquis wheat. It was developed from a cross between Marquis and Prelude, in 1912, at the Canadian Government Central Experimental Farm in Ottawa, with the hope of developing a variety that would combine the early ripening habits of Prelude with the greater productiveness and better straw of Marquis. The cross resulted in several exceedingly interesting and promising combinations, one of which received the name of Reward. This new variety, as it now exists, matures in less than one hundred days from the time of planting, or about fourteen days earlier than Marquis takes to mature. Reward produces an excellent quality of flour and a very fine appearing kernel. The straw is of medium length and excellent strength. It was first released to farmers in western Canada and elsewhere in commercial quantities in 1928, and within two years had captured the world's championship.

### Educational Films

United States Government Loans Motion Picture Films To Canada

Through the courtesy of the United States Government Bureau of Mines, the Canadian Department of Mines, Ottawa, has received the following motion picture films for free circulation throughout Canada:

- "The Story of Sulphur" (2 reels).
- "The Story of Rock Drilling" (2 reels).
- "The Story of Steel" (6 reels).
- "The Story of Gasoline" (3 reels).
- "Heat Treatment of Steel" (2 reels).
- "Through Oil Lands of Europe and Africa" (2 reels).
- "The Story of Dynamite" (2 reels).
- "Carbon Monoxide: the Unseen Danger" (1 reel).

These films are all on standard (35 mm.) stock, and are all non-inflammable except "The Story of Rock Drilling."

No charge is made for the rental of the films, but the borrower is expected to pay express charges. Application for the loan of any of these films should be addressed to the Director, Geological Survey, Department of Mines, Ottawa, Canada.

"The plot thickens," said the old lady as she sowed the grass seed for the third time.

Northward into the Canadian West there is a steady increasing migration of men and women from the United States. Continued long enough this may make up for the loss of population during the past century of Canadian citizens to the great republic.

It may not be so stated in United States school books, but the soil of Canada has played a part directly or indirectly in furnishing the United States with some of its greatest citizens.

In a little churchyard in Norwich, Oxford County, Ontario, rest some of the maternal ancestors of President Herbert Hoover. In the early days they fed from the rocky fields of a Pennsylvania farm to take up land in Canada. Near Norwich, on a soil that was not the best, they struggled on for many a year. Then the news of free land in Iowa caused Hoover's grandparents to yoke up the oxen and head west. Toil and poverty waited the lot of these the Quaker people. It is any wonder that President Hoover now receives with sympathy the pleadings for assistance of the farmers of the United States?

President Hoover's people left Oxford County for Iowa about the time that Thomas A. Edison got a job as telegraph operator 20 or 30 miles north of Norwich at Stratford, in the County of Perth. It is 50 years since Edison invented the incandescent lamp and it is said that he neglected his routine work in the railway station at Stratford to carry on his experiments in electricity.

In the seventies a boy ran away from Victoria, British Columbia, with a circus. His father, a Jew, who had met disaster in the Cariboo goldfields, mourned for David Belasco for many a day. Then David, who was supposed to be dead, turned up very much alive. He lived to become probably the greatest producer in the history of the American stage.

These are but three examples of famous citizens of the United States who have often referred to the influence upon their lives or the lives of their parents of the free and invigorating air of the Dominion of Canada. A complete list would include probably scores of names, among them such notable figures as the late James J. Hill, builder of the Great Northern Railway, native of Guelph, Ontario; the late Franklin K. Lane, minister in Woodrow Wilson's cabinet, from the Maritime; and Captain Robert Dollar, shipping magnate, of Scottish origin, but for many years a logger in the Ottawa Valley—Vancouver Province.

### Encouraging Sheep Industries

Manitoba Department Of Agriculture Distributing Breeding Stock To Beginners

Reports from the livestock branch, Manitoba Department of Agriculture, show approximately 140 head of rams distributed to breeders, mostly beginners, from the Maritime; and Captain Robert Dollar, shipping magnate, of Scottish origin, but for many years a logger in the Ottawa Valley—Vancouver Province.

Trate Editor (to cub who seeks advice at inconvenient moments): "What are you doing now?" Cub: "Just odd jobs, sir."

Trate Editor: "Splendid. Make a bolt for the door, will you?"

## Reproduce Hotel in Sugar

A large model in sugar of the great Canadian Pacific Hotel at Toronto, the Royal York, forty-two inches in height, has been made by Harry Atkey, chief confectioner of the firm "Bakers of Scotland." The model was exhibited at the Confectioners Exhibition, London, England, this month.

"I will meet you Wednesday, or next week."

"I have to go to America next Wednesday."

"Then shall we say Thursday?"

Gutierrez, Madrid.

Lady: "Aren't you the man I gave a glass of port to the other day?"

Tramp: "Yes, and now I have come to see if you could sell me a bottle."

En Rolig Half Timina, Gothenborg.

## WORLD HAPPENINGS BRIEFLY TOLD

The department of national defence has ordered 16 new light aircraft for use in connection with training in the Royal Canadian Air Force, at a cost of \$85,000.

The New Zealand Government has invoked force of arms to enforce its authority over British Samoa, and end the long resistance of Samoan natives to its government.

Immigration to Canada in the first eight months of the current fiscal year—from April 1 to November 30, 1929—totalled 136,440, a decrease of 2,188 when compared with the corresponding period of 1928.

Four crusaders in the cause of greater markets for British Columbia lumber have left for the Antipodes for a four months' sojourn in Australia and New Zealand, studying the requirements of those countries.

Cannibalism is practically unchecked in the famine-swept provinces of China, George Andrews, a missionary from Kansas province, told British and United States missionaries in an address at Shanghai, picturing scenes of almost unbelievable horror and death.

The past year has been one of marked progress for the Alberta Wheat Pool, according to an official report, which shows an increase in membership during the year of 5,819. Total membership at October 31st, 1929, was 46,915 with 4,625,309 acres under contract.

## Heart and Nerves Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes: "Several years ago I was troubled with my heart and nerves and was so bad at times, my hands and feet would become numb and cold."

I happened to see

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price to The T. Milburn Co., Limited, Toronto, Ont.

### Why Dutch Are Sturdy

#### Start Day With Breakfast Of Many Courses

A Dutch breakfast is like no other meal in the world. There are, to start with, at least seven kinds of bread, plain white bread, ginger bread, plain buns, buns with raisins, brown bread, toasted biscuits, sweet cakes and a kind of fruit cake. You will find at least three or four kinds of meat, could sliced veal, roast beef, ham and sausages.

Then, if you don't see it all at once, you smell the cheese, two or three of the Dutch specialties, including limburger and Edam. There are several dishes piled with boiled eggs, and, of course, there are jams and honey and seasonal fruits. The climax is a pot of steaming coffee, not the insipid beverage of the rest of Europe, but the real thing from the Dutch colonies.

### Ask Reduction Of Income Tax

Canadian Chamber Of Commerce Submits Some Important Questions To Federal Cabinet

The views of the Canadian Chamber of Commerce on a number of important national questions were submitted to Prime Minister Mackenzie King and members of the Dominion Cabinet, at Ottawa, recently.

Heeded by Col. J. H. Woods, of Calgary, president of the chamber, a deputation waited upon the prime minister and his colleagues and presented a memorandum based on resolutions passed and subjects discussed at the Calgary meeting of the chamber last summer.

Such important matters as the construction of the St. Lawrence waterways; reduction of the income and sales taxes; seasonal unemployment; development of the Peace River country; construction of a national highway; inquiry into complaints of the fruit and vegetable industries; development of Empire trade, etc., were touched upon in the memorandum submitted.

In connection with the suggestion of the deputation for the further reduction of the income and sales taxes as when warranted by the Dominion's finances, and the avoidance of duplicative taxation," Hon. C. A. Dunning, Minister of Finance, made a few comments. He pointed out that the federal income tax was a war measure, and that the Dominion still required money to pay war obligations.

Suggestions had been made by some of the provinces that the Dominion abandon the income tax. But, said Mr. Dunning, the Dominion could not do without this tax. Another suggestion had been made by certain provinces, however. That was that the field be divided between the Dominion and the provinces. The Dominion, for instance, might retain business income taxation and leave personal income taxation to the provinces. Without making any promises, Mr. Dunning asked the deputation to think over the situation with these suggestions in mind.

### Recipes For This Week

(By Betty Barclay)

#### ORANGE BREAD PUDDING

- 1 cup bread crumbs.
- 2 tablespoons butter.
- 2 cups scalded milk.
- 2 egg yolks.
- 1/2 cup sugar.
- Juice 2 oranges.
- Grated rind 2 oranges.

Soak bread crumbs, butter, and scalded milk thirty minutes; then add egg yolks, beaten with sugar, and orange juice and rind. Pour into a buttered pudding-dish and bake in a moderate oven until firm. Cover with meringue.

#### GRAPEFRUIT MARMALADE

- 1 orange.
- 1 lemon.
- 1 grapefruit.
- Water.
- Sugar.

Slice fruit very thinly, rejecting only seeds and core of the grapefruit. Measure fruit, and add to it three times the quantity of water. Let it stand in an earthen dish over night, and next morning, boil for ten minutes only. Leave until next day, then boil two hours. Measure, add an equal amount of sugar, and boil, stirring occasionally, that it may not burn, about an hour, or until it sheets from spoon. Pour into sterile glasses; let stand covered with cheesecloth, until firm, then cover with melted paraffin.

### B.C. Pilehard Industry

#### New One Of The Most Important Branches Of Province's Fisheries

Starting with the very small beginning of one plant and a catch of 500 tons in 1925, the pilehard industry of British Columbia has assumed very large proportions and during the present year there were 23 plants in operation handling a total catch of 800,000 tons, making the industry one of the most important branches of B.C. fisheries. The product of the pilehard oil and meal this season is valued at \$1,750,000, most of the oil going to the United States where it is used largely in the soap industry, while the meal is shipped to Germany, Japan and the United States.

### Predicts League Will Encircle World

#### General Smuts Says All Nations Will Eventually Join

In not more than ten years the whole human race including Russia will be represented at the council table of the League of Nations. This was the prediction of General Jan Christian Smuts, South African statesman, speaking at a dinner in New York, arranged as a part of the celebrations in the U.S. for the tenth anniversary of the founding of the league.

"It would be a very serious and a very tragic thing," said General Smuts, "if when all the nations of the world gather there, the seat of the founder and inspirer should remain vacant."

In this and other references he paid tribute to the late President Wilson as one of the main forces in bringing the league into existence. The United States, he pointed out, "was bound to enter into international conferences whether within or without the league. The pact of Paris required. In this way the method of conference for disposing of international disputes would become universal and on this point, about peace would be guaranteed without fail."

**Always Ready and Reliable.**—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

#### One Jump Ahead

Cubist artist: "You see, we moderns strive for the purgation of the superfluous, which throws the accent on the inner urge. Do you follow me?"  
 Visitor: "No, I'm ahead of you. I came out of the asylum last week!"

Accidents in London streets are responsible for four people killed and 176 injured every day.

### SUNDAY SCHOOL LESSON

JANUARY 26

#### STANDARDS OF THE KINGDOM

Golden Text: "Blessed are the pure in heart; for they shall see God."  
 Matthew 5:8

Lesson: Matthew 5:1-48.

Devotional Reading: Psalm 24:1-6.

#### Explanations and Comments

The scene, verses 1, 2.—Jesus' rabbi usually sat while teaching, and Jesus followed the custom. Surrounded by His disciples, the Twelve and also others, He opened His mouth and taught them. In Matthew's Hebrew translation—a solemn way of introducing words of great importance.

Receipts For Blessedness, verses 3-10.—Blessed: with this word each of these verses begins. We call them the Beatitudes, from "Beati," blessed, the word with which they begin in the Latin version. Blessedness is higher than happiness. Happiness may seem to depend on circumstances; blessedness always depends upon relationship with God. "Blessedness is an infinitely higher and better thing than mere happiness," says a note in Weymouth's New Testament. "People who are blessed may outwardly be much puffed, but from the higher and truer standpoint they are to be admired, envied, congratulated and imitated."

And who are the blessed? The poor in spirit; and Jesus. Four in spirit is in no sense poor-spirited; rather it is the truest meekness. The poor in spirit are the humble-minded, who are conscious of their need of God, those who, in Dr. George D. Boardman's words, "sometimes it may be, of great spiritual capacities, are at the same time conscious of great spiritual inability." Luke's version gives only "Blessed are ye that are poor." The Expository Times explains that the two statements are one and the same, for among the Jews for a recognized term had been a recognized term for the poor, the poor in spirit, who had dedicated themselves to the service of the Kingdom of Heaven, or Kingdom of God. As it is used here we may think of it as having for its members the followers of Christ, who obey His teachings and seek to embody His ideals. The Sermon on the Mount, which has been called "The Constitution of the Kingdom of God," contains a generous portion of His great teachings.

"How did you find the weather while you were away?"  
 "Just went outside and there it was."

There is some uncertainty as to the position taken by sleeping elephants, but it is believed that they sleep lying down.

### Wilder Silver Medal

W. T. Macoun, Dominion Horticulturist, is Rewarded For Good Work Accomplished

The Wilder Silver Medal, one of the highest awards made by the American Pomological Society, has been given to W. T. Macoun, Dominion Horticulturist, for his work in the breeding of new varieties of apples and in the interests of horticulture generally. The award was announced at the meeting of the American Pomological Society, held recently at Roanoke, Virginia.

Miller's Worm Powders not only exterminate intestinal and other worms, but they are a remedy for many other ailments of children. They strengthen the young stomach against biliousness and are tonic in their effects where the child suffers from loss of appetite. In feverish conditions they will be found useful, and they will serve to allay pain and griping in the stomach, from which children so often suffer.

Eastern newspapers have revived the controversy over the shortest poem in the English language. Years ago the New York Sun gave the prize to this one, entitled "Fieas."

## WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanatoriums, beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness weighs about 125 to 130 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight Send for booklet "WINDOLITE"

51 Wellington St. W.

TORONTO, ONT.

## TAKES HOPEFUL VIEW OF SUCCESS OF NAVAL PARLEY

London, Eng.—Great Britain can only move the principle that other nations move correspondingly with her, and that when an agreement on naval disarmament is arrived at, it shall represent an international policy adopted by the other nations as well as Great Britain, this comprised the keynote of the formal remarks made by Prime Minister Ramsay MacDonald, when he met a couple of hundred newspaper correspondents of all countries, both resident in London and specially sent to the British capital, who will report the naval disarmament conference.

Among points the prime minister established, were that Great Britain is looking for the eventual elimination of the battleship, both on account of its tremendous expense (Mr. MacDonald mentioned they cost £7,000,000 apiece), and also because of the differences among naval experts concerning their utility. Under his leadership, the battleship has been eliminated. It is sought to effect a gradual reduction in their tonnage and gun-power when replacements are made.

British authorities, the prime minister continued, took a hopeful stand on the instruments already effected, such as the Locarno pact, the optional clause of the world court agreement, and the pacts of Washington and Paris with a number of additional regional agreements. These instruments had already given the whole world a greater feeling of security, so that if the risk of war had already been reduced, it was surely reasonable, he said, to expect armaments could be reduced.

Premier MacDonald stressed that if the conference failed, it would mean the world would be faced with 10 or 20 years' competitive naval building. But he was confident it would achieve a treaty effective in reducing navies to the lowest level consistent with national safety.

Today also, Lord Bridgeman, first Lord of the Admiralty, in the former Conservative Government, attacked the Labor Government for lowering the British level of cruisers necessary for Empire defence, from 70 to 50. The justification for this given by the government, the improved atmosphere resulting from the Paris pact, "is most unconvincing," Lord Bridgeman said.

Speaking to the British Naval League, Lord Bridgeman added the belief that some agreement might be reached in a spirit of give-and-take; "but others must give as well as ourselves."

At another meeting, Vice-Admiral E. A. Taylor also expressed grave fears for the future of Britain's naval defences and some doubts as to the security offered by the Kellogg-Brinard pact.

"The Kellogg pact is no guarantee whatever that war is a thing of the past," Vice-Admiral Taylor declared.

## New German Cruiser

Is Named After Vessel Sunk In Battle On the North Sea  
Wilhelmshafen, Germany.—The new German Cruiser "Koeln," 6,900 tons, was ceremoniously commissioned recently, replacing the old cruiser Amazona withdrawn from service. Commander Von Schroeder, in a speech, recalled that the first "Koeln" was sunk in battle in the North Sea, on August 28, 1914, and that only one man was saved after clinging three days to a piece of wreckage. The second "Koeln" was sunk at Scapa Flow.

## U.S. Automobile Fatalities

Figures Show 31,500 People In 31 States Killed In Auto Mishaps In 1929

Chicago, Ill.—Figures made public by the National Safety Council showed 31,500 persons were killed in automobile accidents in 31 states during 1929.

The total was 13 per cent. more than in 1928, the report said, while motor vehicle registration increased only 8 per cent.

More than half the victims were pedestrians.

W. N. U. 1821

## Start Hazardous Trip

Five Men Making Journey Across Rockies On Skis

Jasper.—Five young men have left Jasper, Alberta, on a 300-mile ski trip across the Rocky mountains to Banff. It will be one of the most hazardous adventures of its kind ever undertaken, and if the trip is successful it will be the first time such a crossing has been made during the winter months.

The members of the party are: Vernon and Allen Jeffry, Pete Withers, Frank Burstrum and Joe Weiss, all of Jasper Park, and all experienced mountaineers and skiers. They expect to conclude their trip by February.

The adventure was planned last spring and during the summer adequate caches were placed at strategic points along the route which, in some cases, will be more than 9,000 feet above sea level. At such altitudes very low temperatures, in some cases sixty below zero, are likely to be encountered, and the party will also have to face such dangers as unknown snow conditions and the elimination of trail guides that are visible during the summer.

As far as is known this is the longest continuous ski trip ever attempted anywhere in the world.

## Children Die In Fire

Three Smothered By Smoke Before Rescue Could Be Made

Hull, Que.—Fire which broke out while they were playing about their home, took the lives of the three children of Mr. and Mrs. Pierre-Parise here. The theories entertained as to the origin of the fatal blaze are that either the children were playing with matches or an electric heating plate set fire to the walls.

The dead are: Jean Paul, aged five years; Paulette, two years and six months; and Adrienne, seven months. The conflagration, breaking out during the brief period the mother absent herself to telephone from the ground floor apartment of the triplex in which the Parises family resided, gave off such a volume of smoke that the little tots were smothered before a rescue could be effected.

## Korean Students Strike

Over Ten Thousand Said To Be Involved In Trouble

Seoul, Korea.—One thousand Korean students including 250 girls, have been arrested as a result of a strike of 13 college and high schools, including two missionary institutions run by United States societies.

The strike involved students estimated to number 10,000. It occurred during the post-holiday examinations, and generally out of sympathy for the 800 students arrested last month. The December strike was said to have been due to long standing quarrels between Japanese and Korean students of the middle schools.

Many of those arrested last month still are in prison. Japanese authorities believe the new strike was engineered by a street society with Communist tendencies.

## Launch Big Undertaking

Alberta Livestock Pool Is Going Into the Packing Business

Lethbridge, Alberta.—The Alberta Livestock Pool will go into the packing house business, co-operative leaders announced here recently. It was stated that definite steps were being taken to establish regular plants at Lethbridge, Calgary and Edmonton, the growers to be asked to become shareholders in the enterprise. The campaign in the south, sponsored by the Southern Alberta Co-operative Association, with 2,000 members—the largest co-operative livestock unit in the province—will be launched at once.

## Naval Architect Dead

Victoria.—One of the most widely known architects of his day, and who had to his credit the building of three Spanish cruisers that took part in the battle of Santiago, in 1898, and was founder of the steel ship building industry in Japan, is dead here in the person of James Stewart Clark, following a prolonged illness. He was a native of Troon, Ayrshire, Scotland, and was eighty years of age.

## COUNTESS OF SEAFIELD

The engagement has just been announced of the Countess of Seafield, youngest British countess in her own right, and one of the richest women of England, to Derrick Studley Herbert, formerly an officer in the Grenadier Guards. He is now engaged in business in London.

## Have Important Task

Committee Will Try To Co-ordinate Facts Of Peace

Geneva.—The personnel of the important committee which will have the task of bringing the league's disarmament covenant into harmony with the Kellogg-Brinard peace pact, has been made known by the council of the League of Nations.

The members, meeting on February 12, will be: M. Adachi, Japan; Lord Cecil, Great Britain; B. B. Von Bülow, Germany; E. Cobian, Spain; Mariano Cornejo, Peru; Pierre Cote, France; Vittorio Scialoja, Italy; Francisco Soka, Poland; Nicholas Titulescu, Rumania; M. Unden, Sweden; and Woo Kai-Seng, China.

Their task will be to fill in the gap in the league covenant which tacitly allows armaments consistent with national security and implies action by league members against a nation which starts an aggressive war. The later pact of Paris renounces war altogether.

## Selecting Winner Of Trophy

Trans-Canada Air Award To Be Made Shortly

Ottawa, Ont.—The Department of National Defence has sent out a circular letter addressed to all aviation concerns in Canada inviting recommendations for guidance in the award of the McKee Trans-Canada trophy.

The trans-Canada trophy, donated by the late J. Dalziel McKee, is awarded annually to the Canadian pilot making the greatest contribution to the advance of aviation in this country during the year. Pilots in the employ of government services are barred.

Last year the trophy was won by "Funch" Dickins, and the year before by Captain H. A. "Doc" Oaks.

## Vessel Adrift On Atlantic

Reward Is Offered For Return Of Schooner To Newfoundland

Halifax.—A reward of \$1,000 is being offered by the government of Newfoundland to any officer of any ship who goes aboard the schooner "Neptune" and brings back to Newfoundland the vessel that is drifting at the mercy of sea and wind somewhere in the North Atlantic. Her captain, accustomed only to shore navigation is unable to bring her to port.

This information, broadcast from Cape Race, was received by C. H. Harvie, local marine and fisheries agent. Hundreds of ships crossing the Atlantic would pick up the message.

The schooner has been drifting helplessly since it left St. John's Nfld. on November 29, and was driven out to sea by a hurricane that scattered the fleet of 10 vessels with which the "Neptune" had left for home ports on the northeast coast of Newfoundland.

The "Neptune," carrying 19 persons, was reported "all right," 720 miles southeast of Newfoundland on December 15.

## May Migrate To Mexico

Doukhobors Sending Delegation To Investigate Lay Of Land

Saskatoon.—Doukhobors of Canora district are sending six investigators to Mexico to investigate the lay of the land with a view to possible migration on a considerable scale when spring comes.

Decision to send the delegation, which will represent both the independent and dependent doukhobors, was made at a largely attended meeting in Canora.

Of the delegation which is going to Mexico, two will be from the brotherhood at Verigin, one from British Columbia, and the other three men are: Seville Chernoff, of Verigin; Wasy Novokoshonoff, of Buchanan; and W. Popoff, of Blaine Lake. Peter Verigin, well-known Doukhobor leader, whose father met a violent death in 1924, will accompany the delegation as far as New York. Verigin presided at the Canora meeting.

## Rust Resistant Wheat

Marquillo Wheat Grown At Saskatchewan University For Some Years

Saskatoon.—Although Marquillo wheat, now recommended by the University of Minnesota, is a production of the plant breeders at that university, it has been grown at the University of Saskatchewan for a number of years, and has proved highly rust resistant and equal to Marquis except for a slight yellowness of four color.

This wheat has been crossed with the Marquis at the University of Saskatchewan and Dr. J. B. Harrington, in charge of this work, expects to have offspring of this cross which gives great promise of extremely high milling quality along with the rust resistance of the Marquillo parent.

## Will Be Guest At Banquet

Ottawa.—On his return from his tour in Western Canada, Hon. R. E. Bennett, Conservative leader, will be the guest of honor at a banquet in Clinton, Ont., on January 29.

## Chinese Railroader

Jun-Ke Choy, special representative of the Ministry of Railways for the Chinese Nationalist Government at Nanking, China, (right), who arrived at Saint John, January 4th, from Great Britain, on board the Canadian Pacific liner "Duchess of Richmond," with Mrs. Choy, (centre), and P. C. Chen (left). Mr. Choy is greatly interested in Canadian railroading and while in Montreal, had conferences with Grant Hall, Vice-President of the Canadian Pacific Railway, and with other officials. Mr. Choy expressed himself as deeply impressed with the Canadian Pacific System.

## FARMERS MUST MAINTAIN HIGH WHEAT QUALITY

Saskatoon, Sask.—Unless Canadian farmers maintain the high quality of their wheat, they are in imminent danger of finding no market for it, according to Major H. G. L. Strange, of Fern, Alberta, who addressed the convention of the Saskatchewan Field Husbandry Association at the University of Saskatchewan. Major Strange, once winner of the grand award of the International Hay and Grain Show, at Chicago, and an enthusiastic seed grower has made a study of the conditions in respect to marketing wheat, not only in Canada but also, in England and in continental Europe.

"The man who buys is the important man," stated Major Strange, "and not the producer. If we do not provide a product of quality and at a price which suits the consumer, we will not be able to sell it. Not long ago the cry was raised for two dollar wheat, and we were told that the world could not get along without our grain. During the last six months we have been shown how well the world can and will do without Canadian grain, for the millers of Europe have reduced the percentage of flour from our wheat, which is mixed into their bread, from 35 to 10."

This, stated the speaker, was not because they objected to the higher price altogether, but because the quality in the last few years has been sacrificed for quantity in production. Countries buying Canadian wheat are devoid of sentiment, and Canadians sell their grain to Britain and then buy goods from the United States. The Argentine buys goods with the money received for their grain, and keeps a good customer. Sheer economic necessity compels the British buyers to go where they can get the most value for their money and sell the most goods in return.

Russia is again in the market, and as a result, the price of wheat drops eight cents in Canada. There is no reason for Canadian farmers, with the advantage in methods they have gained in the past five or ten years, not holding the top of the world market with their wheat. If the former high standard is kept up. The only way to do this is to follow the advice of Calo, who, two thousand years ago, said: "Plough well, sow good seed and keep down the weeds." The C.S.G.A. offers facilities for the procuring of good seed equalled by no other organization in the world, and it is up to the farmer to protect his own interests.

## Want Old Age Pensions

Immediate Acceptance Of Government Pension Plan Is Urged For Quebec

Quebec, Que.—William Tremblay, Conservative M.A. for Maisonneuve, urged the immediate acceptance by the Quebec Government of the Dominion old-age pension provisions, speaking in the legislative assembly, in the course of the debate on the address in reply to the Speech from the Throne. He argued that the people of Quebec were aiding in the payment of pensions in other provinces through the Dominion taxes and getting nothing for their own aged people.

## Express Fear For Islanders

London, Eng.—The Daily Express expressed grave fear for the inhabitants of Bardley Island off Carnarvonshire, who have not been reached from the mainland since December 15, due to the gale which has been most persistent since then. They were believed to be without food. There has been no response to beacon lights and other signals, which is declared to be unprecedented.

## Dry Educational Campaign

Detroit, Mich.—A \$50,000,000 dry educational campaign was outlined at a meeting of the anti-saloon league here by its chief, Dr. Ernest H. Cherrington, who declared that education against alcoholism presents the "greatest challenge the socially-minded leaders of an alcohol-free America" have faced in the last hundred years.

There are more than 19,000 doctors in the United States who practise as specialists only.

### Monday's Hockey Game

Our Senior hockey team motored to Edmonton Monday night, to meet the Navy in a regular League event. The Stonys played their usual consistent game, the Navy bunch winning by a score of 10 goals to 1. On its next trip to town, it is expected the team will have its best stick-handlers on the job.

### The New Hockey Sticks

There arrived in Stony on Saturday two new model hockey sticks (the Hitchin Special), and these were put on display in The Sun window. They won the admiration of all local stick-handlers, as the New Model appealed to these as just the

THE INVENTOR.

thing for the contests with the rough and ready outside teams.

It is quite probable a team will be equipped with these, and no doubt the grand stand will be crowded the first night these are put in action.

The stick was originally called Schlitten Læufer, but the patent attorney suggested the stick be named after the inventor. We herewith present his picture, reproduced from a photograph taken in his younger days.

### Church Services

At the English Lutheran service in Stony Plain Sunday evening Pastor Osterman delivered a very fine discourse from the 12th chap. of Epistle of Paul to the Romans, on the duty every Christian owes his Church. In spite of the cold weather, there was a fair attendance present. Mr Rosnau is filling the position of organist in a very capable manner. The next service will be held Sunday, Feb. 2, 7.30 p.m.

Services will be held in St Philip's Church at 11.30 on Sunday next.

Service at United church Sunday evening at 7.30; Rev G A Sauder.

### Open Seasons for Game

Following are open seasons for game—  
Ducks and Geese—Sept 16 to Dec 14th.  
Hungarian Partridge—Oct 1 to Nov. 30.  
Prairie Chicken and Partridge—No open season.  
Doe—Nov 1 to Dec 14  
Otter, Nov. 1 to May 1.  
Beaver, No Open Season.  
Muskrat—Between North Saak. River and Tp. 91, March 15 to April 15  
Game Licences can be had at Sun Office, where copies of the Game Act can be seen.

### Stony Plain and District

Harry Coon is in charge on the day shift at the local station, in the absence of the regular agent on vacation.

Mr Cyril Parker, of Gunn, and Const. Crouch, Onoway, were business visitors to Stony on Tuesday.

Several localities with good receiving sets arose early on Tuesday morning to listen-in on the big broadcast from the Peace Conference.

### United Church Notes.

On Sunday last, at the different points, Rev Sander took as his subject, The Obedience of the Lord's Day, which proved very interesting to those present.

### Duffield Doings.

Members of St Dominic's church held a very successful whist drive in the local school house Friday evening last.

Mr G O'Sullivan was elected trustee at the annual meeting of the school district on Jan 16, vide A Dennill resigned.

On Thursday last Mr and Mrs G Taylor entertained at dinner and whist. Honors at cards went to Mrs G O'Sullivan, Miss Hellum, Messrs C Taylor and O'Connor.

### Hansen's Corners.

The friends of Mr Claude V Young intend nominating him for Councillor in Div. 2, Inga M.D., at the election next month.

Hoot Mon! Diuna, ye ken "Big Jim" was elected trustee at the meeting of the ratepayers of this S.D on Jan. 11.

Trustee Murd McLeod has resigned from the Board, owing, it is said, to the fact that he was thinking of leaving the district. An election to replace him will be held Sat. next, Jan. 25.

The third member of the Board is Mr Dougal McDon ald.

Mr Charles Clark is feeling much better at present.

The local coal mine will not be operating this winter

### Letter from W. J. Stephen

To the Municipal Councils of Alberta: The Dept. of Agriculture wishes to draw to your attention that a number of Field supervisors have been appointed for one month, to commence work Jan. 27. The men will visit all Councils, to stimulate more interest in weed control. They will be prepared to hold special meetings in the different municipal districts.

### 2 Glasses Water, Not Too Cold, Help Constipation

One glass water is not enough—take 2 glasses a half hour before breakfast. You get quicker and better results by adding a little simple glycerin, saline, etc. (known as Adlerika) to one glass.

Unlike other remedies, Adlerika acts on BOTH upper and lower bowel and removes old poisons you never thought were in your system. Adlerika stops GAS and sour stomach in 10 minutes. Relieves constipation in two hours. J. F. CLARKE, Druggist.

### Here and There

(52)

Running well ahead of schedule steel work on the 21 story addition to the Empress hotel, the Royal York addition to construction is being rapidly pushed on and the sixth story is now completed. All steel work is expected to be finished early in February and everything will be completed by March 1 when there will be a total of 1,181 guest rooms at this palatial Toronto hotel.

Hitting a 90-mile an hour clip, a special Canadian Pacific train recently carried two-and-a-half-year-old Delphis Morin, who was thought to be dying of intestinal influenza, from Sudbury to Toronto, for a blood transfusion in the Toronto Western Hospital. Leaving at 1.05 the train reached destination at 6.35, all traffic having been held aside for the special. At 8 the operation was performed and half an hour later the boy was smiling at his friends. He is now well on his way to recovery.

Fighting against Atlantic winter gales the cable ship John W. MacKay has just successfully completed another epic of the seas in effecting repairs to the high speed cable of the Commercial Cable Company over which much of Canadian Pacific cable business is carried to Europe. The cable was snarled in the great 'quake of November 18, the break being discovered within 98 hours of the arrival of the ship on the scene, raising the cable from a depth of 2½ miles and at a point 50 miles from the Western end of the break being part of the job to be done.

"Canary Korndyke Alerts" a five-year-old Holstein Friesian cow, which a year ago claimed the world's championship as a butter-fat producer with 23,390 pounds of milk content 1,680 pounds of butter-fat in 305 days, has beaten her own record. Following her 1923 record this famous cow was the guest of honour at a banquet in Moose Jaw. The latest record for "Canary Korndyke Alerts," is 29,801 pounds of milk with 1,338.25 pounds of butter-fat.

Honey to the amount of \$5,181 pounds was produced in Nova Scotia in 1928, according to official figures, and the 1929 output will likely be much larger as the summer season of that year was much more favorable, says Philip Bishop, of Greenwich (Port William), the largest bee-keeper in Nova Scotia.

Within four to five years thousands of farmers throughout the province of Saskatchewan will have the benefit of all-weather roads running in all directions. The provincial government plans to spend \$5,000,000 annually during the next few years on the construction of six main highways, all-weather surfaced.

Notwithstanding the growing popularity of the motor car and motor power farm implements, the horse is evidently not going into the discard as rapidly as some people might be inclined to believe. Latest official estimate of number of farm horses in Canada as in June, 1928, is placed at 2,376,485. In 1929 the number was 2,407,329, a decrease of only 29,832.

Approx. 10,000 tons of hay have recently been exported from Eastern Ontario and Quebec to buyers in the British Isles. The 1929 exports of hay from Canada are likely to exceed those of 1928.

## The Singing Fool

By HUBERT DAIL

Copyright, 1932, Warner Bros. Pictures, Inc.

### SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, marries Molly Winton, a ballad singer, not knowing he is loved by Grace Farrell, a loyal little cigarette girl. After Al wins fame as a composer of popular songs, Molly elopes with John Ferry, taking her baby, Junior, so she sails for France. Al, broken by the loss of his son, becomes a diletante; but is saved by Grace Farrell, and reverts to appear in a Broadway revue. One night he receives a phone call from Molly and rushes to a hospital to find Junior fatally ill. He sings to Junior, but his son dies. Then Al dashes back to the theatre to find he must sing the same song as his audience.

### CHAPTER XXXI

The bright lights were on, the stage was empty, the orchestra played the opening bars that heralded Al's entrance. But still he stood in the wings as if in a trance, fearful of attempting the song he had just sung to his dying child. The orchestra stopped, started again, and the stage manager ran toward Al.

"That's your number, big boy."

"I can't sing that song," protested Al.

"Not tonight."

The stage manager saw something was wrong, but he didn't know what.

"It's too late to change, now, Al. It's your hit song. Think of the show!"

The show! Al walked on the stage, driven by sheer force of will. There were the lights, there was the orchestra leader, beyond were the dim sea of faces of the audience. Without

knowing it, he fell into his character, the happy-go-lucky singing fool. A roar of applause came up and met him like a great wind. He went into his song, believing he could carry it.

The stage manager relaxed and turned to Grace. "What's the matter with him?"

Quickly Grace explained and they both watched Al with anxious eyes. Would he make it? He was singing bravely, but it was apparent to their well trained ears that he was faltering now and then. When he came to the chorus the quaver in his voice was too intense. Once his voice broke entirely.

Suddenly it seemed to Al as if that sophisticated audience didn't exist. Instead of grown-up faces he saw hundreds of faces of babies and children, pleading and beckoning to him.

Babies and children, who had drifted off into Never-Never Land, and among them Junior! Junior's face and figure came toward him with a heaven known I've suffered with you and for you! You must hold tightly to the will to live—if not for yourself, then for me. "I love you!"

Al stared at her a long time without answering. He said quietly, "You're right, Grace."

Grace saw she had won the first battle, but she knew there would be other skirmishes. However, the first battle was the most important—and the hardest.

Al stayed on with the Marcus revue. Another song was substituted for "Little Feller," but otherwise his routine was the same. And as the night passed the audience was proved. His grip on life grew stronger because he was surrounded by people who sympathized with him and because he had to work.

Strangely enough, Molly had disappeared in much the same way that Al himself had vanished following her elopement. As soon as the first shock of Junior's death had been softened in his mind, Al, at Grace's suggestion, tried to trace Molly. When they heard how John Ferry had gone through her money they were fearful that she might be in want. But Molly had left the city, leaving no trace of her whereabouts. Not until months later did Al learn that she had gone to the home of a relative in the middle west. She never came back to Broadway.

As Al's second recovery progressed, so his plans and Grace's moved closer to materialization. Then came the day when he and Grace, with a few of their closest friends, visited the Little Church around the corner and were married. Marcus, Blackie Joe, and Bill Cline, Al's former partner were in that much the group of friends. When the ceremony was over, Marcus whispered to Al:

"Boy, you've picked the right girl this time."

counter-action. She saw that what he needed now was not rest and escape. He should be forced for his own good to go on as if nothing had happened. She explained that to him.

"Al, you mustn't back down, you mustn't give an inch!" she cried with passionate conviction. "I know how you feel and I sympathize with you. Heaven knows I've suffered with you and for you! You must hold tightly to the will to live—if not for yourself, then for me. "I love you!"

Al stared at her a long time without answering. He said quietly, "You're right, Grace."

Grace saw she had won the first battle, but she knew there would be other skirmishes. However, the first battle was the most important—and the hardest.

### Was Famous Detective

Passing Of Frank Frost, One Of The Most Famous Scotland Yard Sleuths

After many years of well-earned leisure, Frank Frost, one of the most famous old-time Scotland Yard sleuths, died recently in London, Eng., aged 72, after an operation.

One of Frost's most dramatic adventures was when he went to Argentina to arrest Jabez Balfour, financial misdoer, on a mammoth scale, whose story belongs to nearly 40 years back. The detective found innumerable obstacles against him in getting Balfour out of Argentina.

Finally he got his man on a car attached to a locomotive which went at a breakneck speed to Buenos Aires, and despite the efforts to impede him, Frost got Balfour aboard a ship for England.

### Dogs Have Good Judgment

Dogs have better judgment than humans at times. Ever notice a canine romp around a grouch? His instinct knows. He may be dumb, but somehow cynics and pessimists are anathema to him. If a dog makes friends with you, you may be sure your disposition is of the right caliber. Even though he has less sense than you, he has more.

With the 200-inch telescope now under construction, astronomers expect to peer into the depths of the universe three times as far as those heretofore penetrated.

It takes seven years to bring an orchard plant to maturity.

Mind's Words Of Grippe.

### Tribute For Newspaper Editor

One Of Greatest Newspaper Editors Of Great Britain To Be Honored By City Of Manchester

C. P. Scott, chief proprietor of the Manchester Guardian, and until his resignation a few months ago one of the greatest newspaper editors in Great Britain, will be honoured by the city of Manchester when the freedom of the city is conferred upon him shortly.

"C. P." resigned the editorship of the Guardian, which he had developed into one of the most influential organs in the country, in July of last year. The task devolved upon his son, Edward Taylor Scott.

On that occasion "C. P." received from His Majesty a telegram congratulating him upon his editorship of the Guardian for 57 years, an achievement which His Majesty remarked "was surely unique in the history of journalism."

### CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative; are pleasant to take and can be given to the nervous babe with perfect safety. Thousands of mothers use no other medicine for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Alberta's Gas Tax

Despite rebates of \$250,000 within six months to users of gasoline for industrial purposes, Alberta's gas tax has produced a net revenue of \$17,700,000 between April 1st and November 20th, provincial officials state. At least \$50,000 more is expected to be taken by March 31st, 1932, the end of the fiscal year.

Corn cobs much suffering, but Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

### Speaking For Himself

"Call these prize cattle? Why, they ain't nothing to what our folks raise. My father raised the biggest calf of any man around our parts."

"Don't doubt it," remarked a bystander, "and the noisies."

India has a population of 320,000,000, practicing nine great religions, speaking 130 different dialects, belonging to six distinct families of speech.

## TOO MANY GIRLS—

dread wintery weather for the torture it brings from sore faces, chapped hands, frostbite and cold sores.

With the face, hands and arms protected by Zam-Buk, frost and cold winds simply cannotadden, reddens, roughens and chaps your skin. Wash with Zam-Buk Medicinal Soap and apply the Zam-Buk balm after drying.

There is nothing like this Zam-Buk treatment for keeping the skin smooth, strong and flexible. Composed exclusively of rich herbal essences, Zam-Buk soothes and perfumes the tissues and prevents all roughness and soreness.

Where the skin has already become chapped, blistered and sore, Zam-Buk, because of its great antiseptic and healing power is doubly valuable. It takes away the smothering irritation almost immediately, kills dangerous disease germs and quickly heals with new healthy skin.

Zam-Buk is the best remedy obtainable for chapped, cracked hands, cold sores, frostbite, chilblains, winter eczema, burns, scalds, and all wounds and injuries. 50c. box, all chemists.

### Little Helps For This Week

"The love of Christ constraineth us."—2 Corinthians v. 14.

Blest be Thy love, dear Lord, That taught us this sweet way: Only to love Thee for Thyself, And for that love obey.

—John Austen.

"The love of Christ constraineth us."

It is in the light of these words that we come to understand the meaning of the cross of Christ. If love is to be the king of your life and mine, if with us here, amid all the strife and rivalry that make up our "workaday world," the voice that bids us love is to be regnant over all other voices, somewhere or other there must be the spell that compels us to do so. An apostle has found the spell when he wrote, "The love of Christ constraineth me," and other men than he, ay, a multitude whom no man can number, have looked also into the face crowned with thorns, and have learned there how to love.—Henry C. Potter.

Persian Balm—the peerless aid to liveraches. Delightfully fragrant. Dainty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivalled for charm, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

"Dear Lord," prayed the co-ed, "I don't ask anything for myself—just give mother a son-in-law."

### Weak After Operation

"After having an operation, I was very miserable, weak, nervous and very near unto work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no weak spells any more; the pains have left me and my nerves are much better. I feel safe in saying Lydia E. Pinkham's medicines have helped me wonderfully."—Mrs. Wm. H. Beechler, Box 143, Fort Collins, Ontario.

**Lydia E. Pinkham's Vegetable Compound**

## Needless Pain!

The man who wouldn't drive his motorcar had when it's out of order, will often drive his brain all day with a head that's throbbing.

Such punishment isn't very good for one's nervous system. It's unwise, and it's unnecessary. For a tablet or two of Aspirin will relieve a head-ache every time. So, remember this accepted antidote for pain, and spare yourself a lot of needless suffering. Read the proven directions and you'll discover many valuable uses for these tablets. For headaches to check colds. To ease a sore throat and reduce the infection. For relieving neuralgia, neuritis, rheumatic pain.

People used to wonder if Aspirin might be harmful. The doctors answered that question years ago.

**ASPIRIN**

TRADE MARK U.S.

### Stony Plain and District.

Inga Councillors have been busy, these days, with Court of Revision work, having held one in Stony Plain on Wednesday, Jan. 15th; a session in Duffield Jan. 16; and another in Stony yesterday, the 22d, when over 100 appeals were heard and disposed of.

Muir Lake Community will hold another social evening in the hall Friday, Jan. 24th. Arrangements are being made to give a masquerade dance Friday Evg., Feb. 14.

The whist drive given last evening, Jan. 22, in Miller's hall, by Stony Plain Lodge, Loyal Order of Moose, was well attended.

### Weed Inspectors' Course.

A course for weed inspectors will be held at the University the week of Feb. 27th. It is hoped a number of men from this district will see fit to take this course which will fit them for weed inspectors. There is no fee in connection with the course.

### Holborn Happenings.

The annual meeting of Holborn S.D. was held Thursday, the 18th. At the election for a trustee, Mr. W. R. Propp was re-elected.

Holborn U. F. W. A. is arranging for a masquerade dance to be held the evening of Friday, Feb. 14th.

Holbornites will read with interest the report of their A. W. P. delegate, printed on page one.

### With the Curlers

Several carloads of curlers from Edmonton police force motored out to Stony the first of the week, and engaged the local curlers. Skips McCulla and Yeats' rinks won both afternoon games from visiting Skips Cooper and Blackwood. Skips McCulla and Geo. Oppert's rinks lost both games at night by one point to MacLeod and Cooper's rinks.

### Hockey News

The Camrose team, due for a League game here Saturday night, were unable to motor up owing to the blocked roads. To fill the date, the Seniors had a good practice game with the Juniors.

The Seniors are billed to play Varsity's team on the latter's rink on Monday next, Jan. 27th.

Something new in the hockey line was seen at the local rink Monday afternoon, when two mixed teams of girl players tried their hand at the game. The spectators present got a good eyeful before the close of the last period. When they've had a little more practice, they intend to challenge the big team.

The Sporting Editor is tracing the rumor that a local hockey fan has offered the Seniors a banquet at the Macdonald if they win a game.

Juvenile Hockey Record—  
Saints 3; Indians 0  
Eskimos 8; Indians 1  
Saints 1; Eskimos 1  
Saints 3; Indians 1

**Additional Sports on  
Page Six.**

### Spruce Grove News

Capt. E. R. Gibson, the well-known authority on mountain climbing, is leaving today for Vermilion, where he will give a series of lectures on his favorite subject.

Jack Nicols has installed an up-to-date Gramo ready in his restaurant.

Contractor Zucht has finished supplying local consumers with ice from Goetz' lake.

An order from the Gaelic Society has been received at Mac's Wuerst mill for 100 lbs. of haggis, for Bobbie Burns' celebration.

The wedding took place last week of Miss Alma McPhee (daughter of Mrs. McPhee and the late Peter McPhee) to G. R. Williams of Edmonton. The bride is well known in this district.

Mr and Mrs Frank Welborne took part, last week, in the Oldtimers' celebration, in Edmonton.

The Police have been investigating the case of the needy family of John Lafleur. The family consists of the wife and 4 children, aged 11, 9, 5 and 2. They had been living on the I.R. for several months without permission, and had applied to Councillor Hagen for aid; this was not forthcoming, as they lacked the residence qualification. First aid was given by Corp. Moses, and they are now being looked after by the Department.

Mr Jue Brox accompanied by Hy Kuhl made a business trip to Stony on Saturday last.

Mr Wm Leod, local I.H.C. dealer, on Tuesday took in a party of future tractor prospects to the tractor school in Edmonton. This school is made possible thru the efforts of I.H.C. dealers throughout Canada.

Mr H. L. Morrow made a rush motor trip to the Philip Schram camp at Breton, last Thursday.

Mr Leo L. Pearcey, principal at the local school, has been confined to his bed, due to a severe attack of the mumps.

Billiard balls were taking the air (fresh air) on Saturday evening in the new Grove billiard room. One very ardent player shot his ball clear thru one of Jack's bay windows.

The Boy Scout hockey team from the Grove were beaten, for the second time, by the Winterburn Scouts 2 to 0. Carl Loeblich and Clarence Brox were the two outstanding players for the Grove; while Don Bevington and Malcolm Groat were the goal getters for Winterburn.

## Here and There

(443)

The total value of the principal field crops of Canada for 1929 is estimated at \$986,986,000, about \$40,000,000 less than in 1928.

Construction of the new steamer for the service between Saint John and Digby on the Bay of Fundy is well advanced and it is hoped to have it in operation by next August. Grant Hall, senior vice-president of the Canadian Pacific Railway, announced recently on a visit to the New Brunswick city.

Indicating western Canada's importance in the livestock world, 20 head of registered Aberdeen Angus cattle from Glenbrook Farm, famous breeding establishment operated near Brandon by Hon. J. D. McGregor, Lieutenant-Governor of the province, recently arrived at Vancouver by Canadian Pacific Railway for shipment to Australia and New Zealand.

Designed to furnish the immense tractive effort of \$2,300 pounds, a new locomotive, first of its kind on this continent, to be operated on a high steam pressure principle, will be immediately put under construction at the Angus Shops of the Canadian Pacific Railway. It will be one of the most powerful in the world and will supersede the 3,000 engine of the railway as the most powerful in the British Empire. Locomotive and tender will weigh 744,000 lbs. or 14,000 tons heavier than the 600 engine and 120,000 lbs. heavier than the 2,400 locomotive.

Now one \$14,000,000 equipment contract given by the Canadian Pacific Railway to the American Steel Co. of Hamilton, during 1929 resulted in 122 business houses, located in four Canadian provinces securing valuable supply orders and how this far-flung distribution of the company's contract provided steady work and wages for skilled mechanics and large office staffs over a period of months has been revealed by a study of statistics at the National Steel Co. and Canadian Pacific Railway.

T. A. Murphy, M.P. of Toronto, was a passenger on S.S. Montrose recently from Saint John. As an official of the Amateur Athletic Union of Canada, Mr. Murphy is on his way to Great Britain to make arrangements for the British Empire games at Hamilton next August, at which every part of the Empire will be represented by brilliant athletes.

What is regarded as one of the largest real estate transactions on record was made recently when the Canadian Government reached agreements with the Provincial Governments of Manitoba and Alberta for the transfer to those provinces of their natural resources. These include large areas of land, forests, water powers, fisheries, mines, oilfields, etc., and represent a value in excess of a billion dollars. The agreement will be ratified by Parliament at its next session early this year.

The Wilder Silver Medal, one of the highest awards made by the American Pomological Society, has been given to W. T. Macoun, Dominion Horticulturist, for his work in breeding new varieties of apples and for his contribution to horticulture generally. Mr. Macoun has occupied the position of Dominion Horticulturist at the Canadian Government Experimental Farm at Ottawa for the past 41 years.
